About Me

I am a Bachelor of Computer Science graduate with diverse work experience, now focused on pursuing a career in Full Stack Web & App Development.

After Completing an intensive boot camp form WBS Coding School, I have gained practical skills in both frontend and backend technologies, building on my strong foundation in computer science. I am now eager to apply these skills in a professional setting, contribute to a dynamic development team and continue growing as a developer.

I am passionate about problem-solving and committed to continuous learning, making me well prepared for the challenges of a fast-paced tech environment.

English – Advance | German – Intermediate | Urdu & Punjabi -Native

Projects

JourneyPack (AI-Powered E-Commerce Store)

Link: <https://journeypack.netlify.app/>

JourneyPack is an innovative e-commerce platform that tailors shopping experiences based on travel plans.

It collects user inputs such as destination, timing, activities and preferred hotel type.

Leveraging AI, the platform generates a personalized list of recommended items, based on the activities and weather conditions of destination during the selected time frame.

It suggests hotels matching the user's preferences, also allowing them to view and purchase relevant products directly from the store.
